

The PCS Floppy Diskette Replacement series upgrades Foxboro SPECTRUM workstation and computer system storage devices. Large format floppy diskette drives become readily available 3.5-inch diskette drives using a simple upgrade procedure. These new floppy diskette drives offer extended life and lower maintenance cost for the SPECTRUM systems.

## FEATURES

The PCS Floppy Diskette Replacement is specifically designed to replace original 8-inch and 5.25-inch floppy diskette drives in Foxboro SPECTRUM systems. The original floppy diskette drives become difficult to maintain over many years of service. The floppy diskette media can be difficult to purchase from the usual retail suppliers. These replacement diskette drives provide a convenient way to extend the useful life of the Foxboro systems.

Foxboro products supported by **W9335DD** include:

- *Videospec IV (8-inch drive)*

Foxboro products supported by **W9935DD** include:

- *Videospec IV (5.25-inch drive)*

Foxboro products supported by **W9335DU** include:

- *Unit Operators Console (UOC)*

Foxboro products supported by **W9935DM** include:

- *Videospec III*
- *FOX 3 Computer*
- *FOX 300 Computer*

Note that this product is supplied with necessary mounting hardware, cables (if required), one formatted 3.5-inch floppy

diskette and one floppy diskette with DOS-based diskette format program.

## CONVENIENT

The PCS Floppy Diskette Replacement kit contains everything needed to upgrade older diskette drives to new 3.5-inch floppy diskette drives. The new 3.5-inch floppy diskettes can be purchased in most retail outlets.

## FLEXIBLE

A phased implementation approach is outlined in the installation documents. One replacement diskette may be initially installed in the system. Previously stored information on older diskettes may be copied to the new diskettes using the new diskette drive. When all previous diskettes have been copied, the replacement of remaining diskette drives is completed.

## MAINTENANCE

These new diskette drives extend the life of the Foxboro SPECTRUM system. Newer diskette technology is available for less cost through many retail sources.
